SHAHID KHAN

FULL STACK DEVELOPER

Jaipur (Raj) | 78918shahid@gmail.com | https://linkedin.com/in/shahid-khan-079825196 | +91 7891862139

SUMMARY

Full Stack Developer with 3.7 years of experience delivering high-quality SaaS, e-commerce, and ERP solutions. Experienced in building reliable, scalable systems that support real-world business operations. Focused on performance, clean architecture, and practical AI-driven enhancements to improve efficiency and user experience.

PROFESSIONAL EXPERIENCE

Software Engineer, Sedar Global, UAE **Sep 2024– Present**

- Contributed to a large-scale Next.js e-commerce platform and ERP Software serving multi-region users.
- Took ownership of backend development using Node.js for ERP-integrated applications handling measurement, lead, and customer workflows.
- Reduced API latency by ~35% through Redis caching and SQL query optimization.
- Improved page load performance by ~40% via SSR optimization and dynamic metadata handling.
- Built and maintained REST APIs for ERP modules ensuring reliable and scalable backend operations.

Software Developer, Dixit Global Tech Pvt. Ltd., Bengaluru **Jan 2023 - Aug 2024**

- Handled web application development both independently and within a team, ensuring reliable and timely feature delivery.
- Designed and implemented scalable and maintainable backend logic aligned with project requirements.
- Optimized application performance by improving database queries, API response time, and backend processing.

Web Developer Intern, Zeetron Network Pvt. Ltd.,Jaipur **Jun 2022 - Dec 2022**

- Learned and applied Software Development Life Cycle (SDLC) concepts, understanding real-world project workflows from development to deployment.
- Assisted in developing and maintaining web application features, gaining hands-on experience with frontend, backend, and API integration.
- Collaborated with senior developers to debug issues, implement enhancements, and follow industry best practices for clean and maintainable code.

SKILLS

- **Languages:** JavaScript (ES6+), SQL, TypeScript
- **Frontend:** React.js, Next.js (SSR/ISR), Bootstrap, jQuery
- **Backend:** Node.js, NestJS, Express.js
- **Database:** MySQL, PL/SQL, SQL
- **AI Tools:** Cursor AI, GitHub Copilot, Trae Ai
- **Architecture:** Distributed services, RESTful APIs, Event-Driven Architecture
- **DevOps & Tools:** Docker, Git, GitHub, GitLab, Jira, Postman

PROJECTS

Sedar Spine ERP

Link : https://www.sedarspine.com/en/

Tools : Node.js, Express.js, PL/SQL, TypeScript, NextJs

- Worked on an enterprise ERP ecosystem built on a distributed backend architecture where multiple applications operated independently while sharing a common multi-schema database.
- Developed backend services in Node.js and contributed to supporting applications built with Next.js integrated with the core ERP system.
- Designed and implemented REST APIs for lead creation, customer data management, and automated WhatsApp voucher processing.
- Implemented reliable data synchronization between measurement application, outreach system, and ERP to maintain consistent and accurate business data.

Sedar Global E-Commerce Platform

Link : https://www.sedarglobal.com/uae-en

Tools : NextJs, PL/SQL, TypeScript, ReactJs, Bootstrap, MaterialUI, Docker

- Worked on a large-scale e-commerce application built with Next.js, supporting multiple regions and languages for global customers.
- Containerized the Next.js application using Docker, enabling consistent builds, simplified deployment, and improved scalability across environments.
- Implemented server-side rendering (SSR) and performance optimizations to improve page load speed and overall user experience.
- Enhanced application performance, resulting in significant improvement in Lighthouse and PageSpeed scores.
- Developed advanced product customization features using Three.js, enabling interactive and dynamic user experiences.

CorpVenue – Event Booking Platform

Link : https://www.corpvenue.com/

Tools : NextJs, MYSQL, TypeScript, Bootstrap, CI/CD

- Developed a full-stack event booking platform using Next.js and TypeScript with focus on performance and scalability.
- Implemented Server-Side Rendering (SSR) to improve initial load time, SEO, and overall user experience.
- Built and integrated REST APIs for booking management, customer data handling, and real-time availability updates.
- Developed admin features for managing bookings, destinations, and pricing operations.

EDUCATIONAL INFORMATION

- **Bachelors Of Computer Application, MDS University Ajmer** **2019**
